INDEX BACK OF PRICES CURRENT

NEW YORK

Printed by J. F. Johnson & Co. at the New York Press

PREFACE.

WE take pleasure in presenting to the Druggists of the United States and Canadas our Annual Prices Current in a new shape, having for their convenience combined our well-known Illustrated Catalogue with the regular price list, and also made a considerable addition to the illustrations, introducing many new articles not before quoted.

No expense has been spared to render it a useful and complete book of reference for the trade generally, and as well as being a complete Prices Current, it will serve as a general guide-book and be found serviceable in replenishing stocks, and also very useful to those about to embark in business.

As the manufacture of glass labels for druggists' shelf bottles is an important branch of our business, it may be well to state that, although the price of glass labels has been so far reduced by some makers who are using inferior materials in their manufacture, that a first-class label can not be produced at the present

price with any profit to us, nevertheless we will continue to maintain the old standard of excellence for our labels and will furnish them at the same price as the inferior articles are sold at by some makers.

Parties ordering for the first time will see the propriety of giving references (city preferred) as to their responsibility.

Our terms are cash in thirty days, unless otherwise arranged.

In conclusion, parties who may favor us with their orders, whether for large or small quantities, may be assured of our best terms and of prompt attention.

Special quotations will be given with pleasure.

Very respectfully,

JEREMIAH QUINLAN.

DANIEL QUINLAN.

DRUGGISTS AND APOTHECARIES'

FURNITURE ARTICLES.

THIS WARE IS MADE OF THE BEST CRYSTAL GLASS.

QUINLAN'S PATENT NOVELTY DRAWER-PULL.

FIGURE 1.

On account of some objections being made to our old Pull, as persons state they could not read it readily when placed on the bottom row of drawers, we have thought it well to introduce the above Pull, which has a projecting angle. It is composed of three parts, and when adjusted appears as Fig. 1. A similar Pull, made to imitate OUR PATENT, has been in the market, but in pulling heavy Drawers, the outer frame is liable to fall off and is apt to break the label. In this Pull this is avoided by a small screw, which fastens the same together.

Finished in Italian Antique French Bronze. Price \$3.20 per doz., complete with glass label.

Quinlan's Patent Convex Drawer Pull.

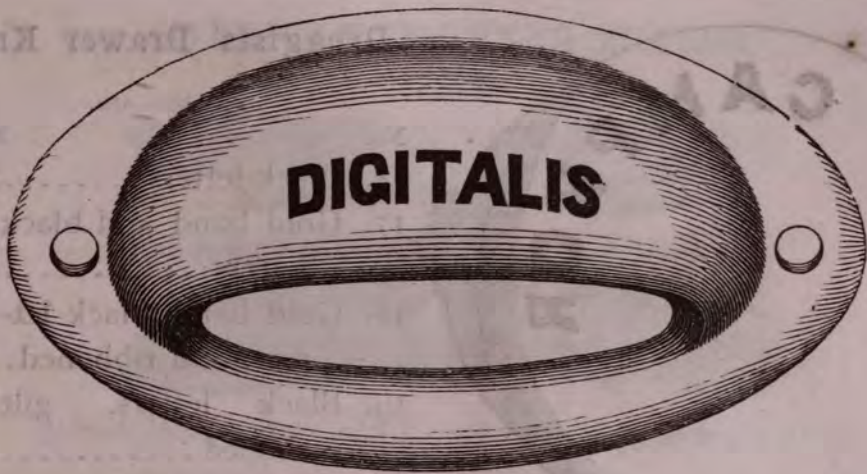

ENTIRELY NEW.

The construction of this pull is entirely different from any other style now manufactured, being more ornamental in appearance, novel and compact in design. It consists of a handsomely moulded metal frame (Bronze, Antique, or Nickel) holding a convexo-concave metal plate with a correspondingly curved heavy glass label, which can be lettered in any style. This curve-shaped label in pull affords ample room for writing the longest names, with little or no abbreviations—two or more lines of writing being sometimes requisite to indicate contents of drawer. (This can not be done with any other pull made.) The curved pull label can also be read distinctly in any position and at a greater distance than any other now made. The finger or pull-rest is placed under the glass label, thereby econo-

mizing space, and thus rendering this pull the most desirable in the market.

Price \$4.00 per dozen, complete, with labels.

Patent Porcelain Drawer-Pulls.

Clock and Flower Shades.

Clock and Flower Shades.

The whole number of inches in a shade is ascertained as follows:

ROUND SHADES. — Add once the height to three times the diameter.

OVAL SHADES. — Add once the height, twice the large diameter, once the small diameter, and three inches over.

SQUARE SHADES. — Add once the height, twice the large diameter, once the small diameter, and five inches over.

When the height of a Shade, round, oval or square, is less than the large diameter, it is counted as being of the same number of inches as said diameter.

Orders for Summer Stock.

But little, if any, Glass can be made in Summer, owing to the heat. It is therefore desirable that our customers, in order to procure a stock of Glassware to meet their wants *during the summer*, should, *so far as practicable*, send in their orders by the 1st of June in each year.

PRESCRIPTION LETTERED DIES.

We have the following sets of Dies prepared for the insertion of names, without the expense of making a new mould for each name to be inserted.

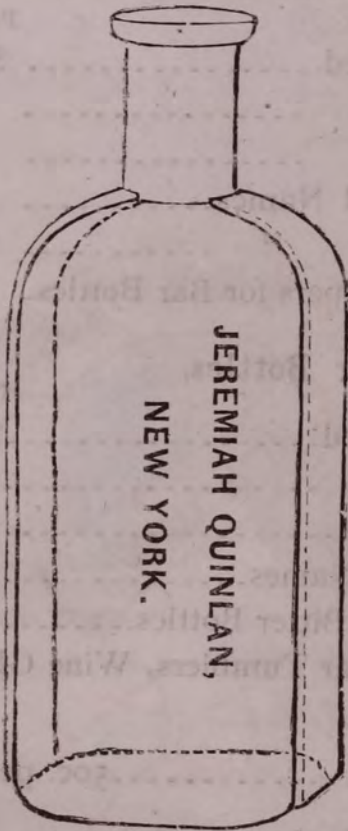

When the Die has been lettered, the cost of the ware is the same as that of unlettered ware.

**Recess
Bar Bottle.**

Also, their well-known brands of SMOKING and CHEWING TOBACCOS.

Improved Fountain Syringes.

Having recently made several important improvements in the

"Fountain Syringe,"

and having established a manufactory and salesroom at

44 CORTLANDT ST.,

NEW YORK CITY,

we respectfully solicit the patron-

age of the "Trade." We feel now that the article is perfect in every respect. Operating automatically, dispensing with all pumping, valves, etc., they make by far the most natural and desirable syringe. Those now in use inject no air, which produces pain, if not danger, to the sick and sensitive; they also serve for many other purposes, making the best nasal douche that can be made for catarrh and other similar diseases, having a sprinkler for the floor, carpets, plants, sores, etc., and for a light shower bath. It is for these and other reasons that hospitals and medical institutions have adopted them, and the most eminent physicians have spoken of them in highest commendation.

Price List of the Improved Fountain Syringe.

No. 1.—Holding One Pint	\$2 00
Quarter Dozen	5 00
Half Dozen	9 00
One Dozen	16 00
No. 2.—Holding One Quart, and having Extra Nozzles, etc.	2 50

J. Bumgardner & Son's Celebrated Rye Whiskies.

These Whiskies are celebrated for their

FINE QUALITY AND MEDICINAL PURPOSES,

And stand unquestionably the Finest and Purest Whiskies made in
the UNITED STATES.

PEACOCK'S
PATENT
Physicians' Pocket Bottle Case.

PATENTED DEC. 20, 1863.

The peculiarity of this Case is the Metallic Springs which hold the vials, instead of leather loops, as in the old style.

The Springs are covered with leather, thus presenting a soft surface to the vial; the Cases are made of light wood, covered with morocco, and finished in the best manner.

Among the advantages which these Cases present over the old style, may be mentioned the following:

First—Much greater durability.

Second—The Metallic Springs will not get loose, as the leather loops do, but will continue to hold the vials firmly in their places, while the elasticity of the Springs allow the vials to be easily removed and replaced.

Third—The Springs extending only two-thirds the circumference of the vial, leaves one-third exposed the entire length, thus allowing the label to be placed longitudinally on the vial, which, as it lies uppermost, can be more easily read than when extending round, and is less liable to be defaced.

Manufactured and for Sale to the Trade by
H. H. PEACOCK, Philadelphia, Pa.

The following sizes kept in stock: containing—8, 10, 12, 16, 18, 20, 22, and 24 two-drachm vials. Special sizes made to order.

Kept in Stock by JEREMIAH QUINLAN.

ESSEX. No. 5. (A.)

ESSEX. No. 5. (B.)

ESSEX. No. 5. (C.)

UNEQUALED.

ESSEX'S

**Improved No. 5 Nickel Silver
ATOMIZER.**

An Apparatus for the Atomization of Liquids for Inhalation, Odorizing, or Face Baths, and for Perfuming and Disinfecting the Sick Room. It also contains a perfect Douche for Bathing the Head, Sensitive Eyes, Painful Surfaces, Burns, or Inflamed Sores.

By this Atomizer a single drop of perfume is converted into numberless minute particles, which fill the surrounding air with fragrance. The toilet of no lady or gentleman is complete without this instrument.

MANUFACTURED

Under Patent June 27, 1871.

BY THE

Essex Manufacturing Co.

JAMES J. ESSEX, Agent,

Of the late firm of C. H. DAVIDSON & Co.,
Manufacturers and Proprietors of
the Davidson Syringe.

The Frigid Soda & Mineral Water Apparatus

AGAIN TO THE FRONT.

My exhibit at the United States Centennial Fair, Philadelphia, Pa., for 1876, embraced a portion of my numerous designs, which were taken from my general stock; not a single article was made for special criticism, and yet it bore the strongest scrutinizing test in comparison with goods which had been for months in preparation for this special occasion and examination.

The judges rendered the strongest verdict in favor of this exhibit, as follows: Fine workmanship, elegant designs and modifications, well adapted for the purpose intended, and recommended the same to the Centennial Commission for award.

Signed by group of judges, attested to by Chief of Bureau.

The highest award, a bronze medal, was made by the Centennial Commissioners at Philadelphia, Pa., September 28, 1876, as may be seen by reference to the papers of that date, quite unlike the reconsidered awards doctored up for disaffected parties, and bearing date October 7, which may be found by reference to the public prints of that date.

My Claim for the Frigid Soda and Mineral Water Apparatus:

Goods manufactured on scientific principles, in conformity with natural laws.

Large ice chamber, free from obstructions, perfectly insulated, with large exit, purity of materials.

Embracing the principle of my patent: first, evolving by ice water; secondly, by dry ice, with the largest cooling surface in use; added to this, ease of cleaning, simplicity of connections, its extreme durability, these combine to make an apparatus that is always in order.

Whilst more than twice the work and stock is put into my draft apparatus compared with those of any other make, my charges are less.

For further proof of excellence, please examine my apparatus, which is in very general use throughout the United States and almost every country on the globe.
